

Introducing

ScienceWorks - Current Electricity Workshop - online

Since STAO 2000, ScienceWorks has run the Current Electricity Workshop at our annual conference and at various regional workshops. Perhaps you attended one of these and would like to refresh your memory.

Thanks to a generous donation from RIM (Research In Motion) we are now able to provide this workshop, online.

You are now able to freely download and edit all of the student notes (See the top of each Lesson)

In addition you can;

- View videos from STAO 2008 to virtually attend the workshop or refresh your memory of a workshop you have attended
- View videos on how to make the suggested demonstrations
- Download and show your students the “How to Wire the Lab” videos
- Receive help from the course facilitator for any questions you may have.
