

# Human Organ Systems - Research

What is the organ system you are researching?

Brainstorming - Write down as many questions as you can think of that you would like to be answered while researching your organ system.

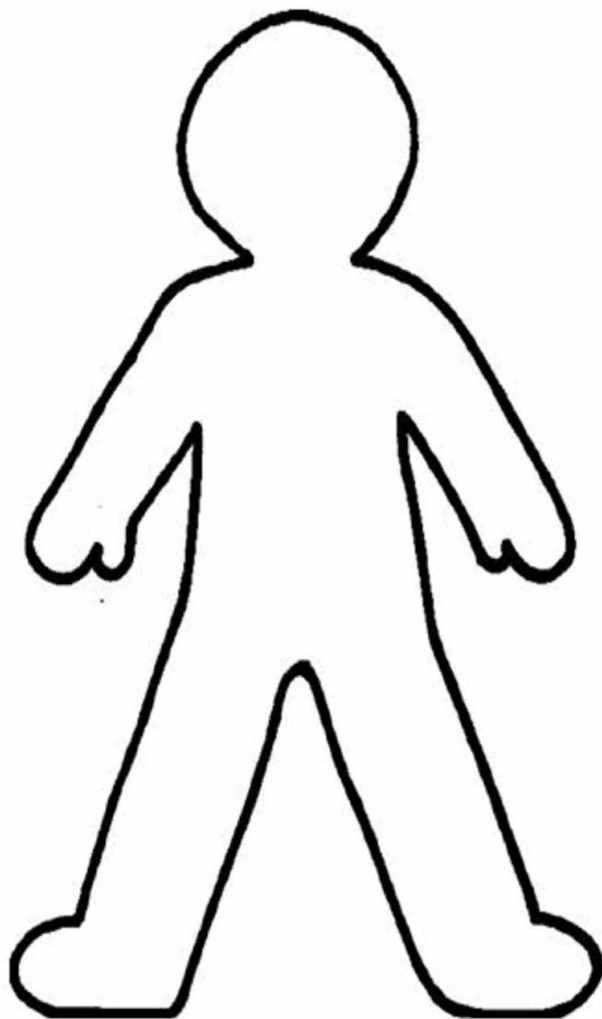

## Project Rubric

	<b>4</b>	<b>3</b>	<b>2</b>	<b>1</b>
<b>Content</b>	The group accurately explained how their body system functions.	The group mostly explained how their body system functions.	The group missed some important information on how their body system functions.	The group missed a lot of important information on how their body system functions.
<b>Graphic Organizer</b>	The group fully and accurately completed the graphic organizer, in their own words	The group completed most of the graphic organizer, but it is not all accurate	The group completed some of the graphic organizer but it's missing key information and accuracy	The group completed very little of the graphic organizer and what they have is not accurate
<b>Body – Neatness</b>	The final project was done very neatly, was exceptionally well organized, creative and coloured.	The final project was done neatly, was organized and coloured.	Parts of the final project were either not well organized or neat.	The final project was lacking neatness, organization, and/or colour.
<b>Body – Labels</b>	All important body parts/organs are labeled correctly, neatly and spelled correctly.	All important body parts/organs are labeled correctly and neatly.	Some important body parts/organs are not labeled, or work was not done neatly.	Body parts/organs are inaccurately labeled, labels were missing, and work was careless.
<b>Body – Content</b>	Information portrayed using Scratch is detailed and accurate	Information portrayed using Scratch is accurate	Information portrayed using Scratch is somewhat accurate and/or missing some important info	Information portrayed using Scratch is inaccurate and/or has very little/no detail
<b>Group Work</b>	Group members worked well together at all times and were always on task.	Group members worked well together but had trouble staying on task.	Group members had some trouble agreeing, but were able to complete the project.	Group members had difficulty working together and the project suffered.

What are the **major organs** associated with your organ system? Beside each describe what it does and why it's important.

What other organ systems does your system work with? Beside each describe how they work together.

Describe how your organ system works, be detailed.

Draw and label a diagram of the important parts of your organ system, showing how it works.

Identify and describe 2 common diseases that can affect your organ system. Explain how they affect your body and describe them in detail.

Choose 1 of the questions from the first page - one that you have not already answered on the graphic organizer - and find the answer. Be sure to copy the question down below and write the answer underneath.
