

### **EXAMPLE: Social Media Poster Task**

Create a digital poster, video memes, cartoon, etc... that will ACTUALLY be posted to social media to address things that teenagers can do to reduce their ecological footprint. This needs to help a **younger target audience** (you can choose the age) learn about practical and attainable ways they can reduce their own footprint. You can choose where it will be posted to (Instagram, Twitter, etc...).

<b>Concerns</b> <i>Areas that need work</i>	<b>Criteria</b> <i>Standards for this performance</i>	<b>Advanced</b> <i>Evidence of exceeding expectations</i>
	Information is correct, up-to-date and age-appropriate	
	Presentation is eye-catching, easy to understand and includes colour/diagrams/pictures	
	At least 3 strategies are obvious	

#### Other Ideas for Science

<b>Concerns</b> <i>Areas that need work</i>	<b>Criteria</b> <i>Standards for this performance</i>	<b>Advanced</b> <i>Evidence of exceeding expectations</i>
	Proper terminology is used correctly	
	Lab technique is meticulous, safe and uses equipment properly	
	All calculations are included and easy to follow	
	Group work is on task, efficient, and respectful	
	Valuable feedback is provided to classmates	
	Graph includes title, legend, labelled axes, and points are plotted accurately	
	Presentation is informative, and keeps the audience's' attention	

	Procedure is numbered, written in past tense, and includes all necessary steps to perform the lab.
