
The End of Sushi

<http://thewaterbrothers.ca/end-sushi/>

1. What are the dangers of the popularity of sushi?

2. what results from restaurants giving so much choice?

3. If blue fin tuna is sold in the market in a large scale every day, yet they are endangered. How do you suppose we get the message across to the restaurant and fishermen?

4. If it takes 10kg of anchovies and sardines to support 1 kg of tuna...what does that mean for the poor populations of people that also feed on the same food?

5. Why should we be concerned about Mercury?

the
Water Brothers

6. Why is the University of Guelph bar coding organisms?

7. Talk to your group. Pretend you needed to turn this into an initiative for a water docs project. What would your message be?
