What is STEM Club?

Join us with your class for a fun and interactive STEM activity! Each week features a different hands-on activity, with curriculum links to Grades 4-6 and exposure to inspiring STEM role models who study, work or do research in a field related to the activity.

Activities feature minimal, easy to find materials, making it ideal for busy educators and caregivers, no matter what their learning environment looks like!

Schedule

- During the school day
- Available in English and French
- Recordings will be made available to anyone registered each week so you can easily watch them on your schedule

Requirements

- Access to Zoom
- Internet connection
- Access to basic supplies (scissors, pencils, straws, etc) - a list will be provided in advance for each activity. Note that consumable materials will be sent, at no cost, to a number of eligible classrooms.*

***Note:**

Special accommodation will be made for a number of schools in need. These schools will be provided with all materials to participate in 4 weeks of activities, by mail at no cost! Any school in need is invited to apply in advance by filling out [this form](#).
